

Beacon of Hope Hospice

Honorable Mention: Home Health Agency

"I feel that Hospice is underutilized and definitely misunderstood," said Laurene, the director.

"I chose this profession not only to provide commitment, caring and comfort to patients and their families at end of life, but also to assure that they receive the best my staff has to offer them.

"It is truly not about dying, but about how much time someone has to live."

Beacon of Hope Hospice specializes in palliative care when curative treatment is no longer effective.

We are experts in pain management and symptom control.

Our focus is to ensure comfort and compassionate care while maintaining individual dignity and enhancing the quality of life.

We strive to live by our company mission and values. Patient care is our No. 1 priority.

We have qualified and dedicated staff who provide excellent customer service and care by going above and beyond to meet the needs of our patients and families.

We are very excited and pleased to be receiving this award. Although this is our first opportunity of being recognized in this manner, we are certain there will be many others in the future.

Beacon of Hope Hospice believes in providing the best care possible.

We are committed to the communities we serve and are dedicated to supporting communities, patients and their loved ones through the challenges of end-of-life care.

As we continue to experience growth, we look forward to learning of more ways in which we can be supportive within each community.

Our team of hospice professionals are here when you need us.
